

# Are you a TM1 customer looking to move to Anaplan?

## Our TM1 to Anaplan Roadmap offering

Servian has some of the best TM1 consultants in Australia who have now dedicated themselves to delivering planning solutions in the Anaplan platform.

**Anaplan servian**

Anaplan has redefined the performance management market with a 'born in the cloud' solution designed for planning across your entire enterprise.

Every organisation is looking at their cloud strategy and wondering how their planning solution will fit into the architecture for the next 10 years.

Many CFO's and CIO's just don't want the headache of dealing with IBM anymore.

If you want to explore how Anaplan could replace your current TM1 deployment, then let Servian guide you through our Roadmap offering. We come onsite and talk to your system admins, users and stakeholders to define your current state and potential future state. This gives you confidence of either sticking with your current deployment or confirming there is ROI in moving to Anaplan.

### Roadmap

In 5 days onsite, we will explore your current TM1 environment, models and licensing within the context of your business strategy. Our report will then outline if there are advantages of moving to Anaplan as a platform to replace TM1 and what the ROI might be.

#### Inclusions

Review of your current:

- TM1 licensing model
- TM1 Models, memory usage, CPU usage, best practices
- Security Model
- Data Integration Strategy
- Cloud Vision

**\$10,000**

ex GST  
Duration: 5 days
