

Servian DevOps Compass

The Servian DevOps Compass enables you to understand the maturity levels of your businesses systems and Continuous Delivery capabilities, creating a comprehensive strategy for modernising development and deployment practices.

Additional Key Benefit

DevOps explained through business value

- Clear roadmap that focuses on business values.
- Structured workshops for all levels of the business, with everyone on one journey.
- Case studies demonstrating how the changes add value to the business.

Key Activities

Gather all architectures, structures and models

- Engage with stakeholders with all teams active from day one.
- Gathering all system architectures for the given product.
- Use Hava.io and other products to better understand your cloud infrastructure architecture

Workshops and breakout sessions

- Tried and tested workshops that benchmark current capabilities.
- Technical deep dives to understand the development process and opportunities for enhancements.
- Group discussions to provide immediate recommendations and feedback for your team.

Presentations for all levels of the business

- A concise roadmap, technology tree, detailed report.
- High level presentation of recommended next steps and best value innovation.
- Interactive Q&A session

Client Challenges and Why

Business case for DevOps

- Clients understand the need automation and DevOps but struggle to articulate why. The DevOps Compass provides you with clear value propositions for the business, not just the tech!

How do you measure the automation?

- You can say you're doing "DevOps", but how do you measure improvements and value? The Compass provides you with a clear baseline and benchmark of your capability. It identifies phases of delivery that uplift capability in a way that means something to your organisation.

What's first?

- The work to implement Automation can make you want to stick with the status quo. The DevOps Compass program provides a clear and concise path to deliver the new capability in stages. Your teams learn as they go and they have Servian in their corner ensuring that the work gets done.

What's next?

Maturity report

- This report outlines the scoring across seven key areas: Build Management & Continuous Integration; Environments & Deployment; Release Management & Compliance; Testing; Data Management; People & Culture.
- Each has a point score which feeds into an overall maturity score for the application.

Roadmap

- A roadmap that lists the next steps and low hanging fruits that make a positive impact on the business. Each has a point score which feeds into an overall maturity score for the application.
