

Secrets Management

The Servian secrets management platform provides a secure, central secrets store service to both the public cloud and on-premises solutions. The core network, security, and operational capabilities required for a successful cloud journey is delivered as extendable Infrastructure as Code.

Our solution provides proven secure code best practice and automation that allows businesses to eliminate static, hard-coded credentials by centralizing secrets in the platform and tightly controlling access based on trusted identities.

Servian Secret Management Capabilities

- Secure Storage
- Credential Leasing & Revocation
- ACL Governance & Templating
- Detailed Audit Logs
- Encryption as a Service
- Key Rolling
- Cloud auto unseal
- HSM Support
- Multi-tenancy

Foundation Details
