servian_

Servian Academy

The Servian Academy provides just-in-time professional training for the latest tools, frameworks and methodologies in software delivery. Servian Academy is the answer to ensuring that your teams are up to speed with the newest technology and best practices, as well as being across a tailored business and delivery concept curriculum.

Servian operates in multiple learning mediums; lecture style, online interactive, group sessions, and hands-on, understanding that different individuals learn differently.

Face to Face training

- Training programs tailored to various job roles
- Training conducted to the right people, at the right time
- Training conducted by technical engineering staff

Online Learning platform

- Out-of-the-box, customised, current, self-paced e-learning courses through Cloud Academy
- Learning pathways to industry certifications
- Measure your staff's capability growth in the cloud

Live fire-drill exercises

- Demonstrate capability in a fun and controlled environment
- Promotes self-learning and teamwork
- Expert advice on-hand to guide participants through the process

Why customers engage Servian for training:

- Custom learning platform with tailored education plan
- Access to industry expert advice and mentoring
- Live 'fire drill' exercises to get hands-on experience in a controlled environment.
- Certificates of completion
- Clear pathways to industry certification

Why Servian?

- Our instructors are consultants who have hands on experience to solve problems for our customers.

- We train ourselves - we use our own training programs to continuously train our 500+ consulting staff across each of our regions, and focus on the latest technologies, frameworks & methodologies, including public cloud services (Google, AWS & Azure), across Cloud Architecture, Data Engineering, Data Science & AI, DevOps & CyberSecurity.

- We are specialists in public cloud services - we hold numerous specialisations on Google Cloud, AWS & Microsoft Azure, including Data & Analytics, Application Development, Data Platform, DevOps, Marketing Analytics, Data Science, and more.

- Complimentary training available - SQL, Spark, Advanced Kubernetes, Confluent.
